## GTK/GTK+

**Quick history:**

GTK was originally designed and used in the GNU Image Manipulation Program (GIMP) as a replacement of the Motif toolkit. GTK was re-written to be object-oriented & was renamed GTK+. This was first used in the 0.99 release of GIMP. GTK was subsequently adopted for maintenance by the GNOME Foundation.

**Officially supported Language of development:**

C, C++, C#, Genie, JavaScript, Perl, Python(PyGObject, PyGtk), Vala.

**Native Widgets :**

GTK/GTK+ can be configured to change the look of the widgets drawn. This is done using different display engines.

**Maintenance of the library:**

Last release: 3.24.23 / September 4, 2020;

**Documentation:**

https://www.gtk.org/docs/apis/

**License:**

LGPLv2+

**Example Applications developed:**

Transmission   Password Safe   GIMP   Fonts   Calculator   Dictionary
